Prof. Ziegenjammer	Jerry Tuwich	Bob Pronk	The Bear	Pantomime Horse

At a secure biotech laboratory somewhere in Southern California, Professor Ziegenjammer's research team has been awarded a large grant to study one-celled organisms of potentially extraterrestrial origin. As per the custom in Ziegenjammer's lab, the new grant is being celebrated with a costume party.

☒ Professor Ziegenjammer (Costumed Scientist)

The Professor is of uncertain national origin, but his accent suggests that he is a refugee from a Rocky and Bullwinkle cartoon. He is sure that this project will allow him to prove that there are extraterrestrials living among us, but he thinks that about every project.

☒ Jerry Tuwich (The Horse's front end)

Jerry is a postdoc in Ziegenjammer's lab. He is rather shy, and Bob is his only friend in the city. Jerry's fond of tongue twisters, anagrams, and trying in vain to drink Bob under the table.

☒ Bob Pronk (The Horse's rear end)

Bob is a lab technician. He has no real talent for science, but he puts in his eight hours a day. He has taken it into his head that he needs to introduce Jerry to some women.

☒ The Bear (A Bear)

Experiments on the bear have not been approved by the Animal Subjects Review Board, so his presence in the lab next door is undocumented. He has an excellent sense of smell and was lured to the party by the bean dip.

☒ Pantomime Horse (A Spy)

These are two agents of some sinister organization, crashing the party in deep disguise. They were hoping to steal prototype biological weapons, but they would settle for evidence that the United States is on the brink of communicating with space aliens.
